

TORO is the final result of a process that incorporates scientific and sculptural aspects to design.

TORO came to be while looking for a way to construct a toroidal figure from assembled solid wood modules. After a thorough study of several geometric figures and the construction of physical mockups and 3D models, in order to explore their modular characteristics, the structure of TORO was conformed by the repetition of only three different figures.

All pieces are cut from a single board of certified tzalam wood and the assembly of the modules, the polishing of each part and the finish, in natural oil, is carried out manually.

The glass surface helps preserve the sculptural qualities of the piece. Its transparency creates a floating area contained within the wooden structure that allows the user to appreciate the beauty of the the material and the patterns generated by its veins and joinery.

DESIGNER **Pedro Cerisola**

YEAR **2017**

EDITION **Limited to 50 pieces**

DIMENSIONS **Ø 130 cm x 35 cm / Ø 51 in x 13.8 in**

MATERIAL **Available in tzalam and machiche**

LEAD TIME **8 - 10 weeks**

PRICE **USD \$ 6,825.00**
